

RAPORT

La lucrarea de laborator nr. 2
la disciplina «MIDPS»

**«Version Control Systems si modul de setare a unui
server»**

Autor: Alexandr Ialticenco

lector asistent: Irina Cojanu

lector superior: Svetlana
Cojocaru

Obiectivele lucrării

- Înțelegerea și folosirea CLI (basic level)
- Administrarea remote a mașinilor linux machine folosind SSH (remote code editing)
- Version Control Systems (git || mercurial || svn)
- Compilează codul C/C++/Java/Python prin intermediul CLI, folosind compilatoarele gcc/g++/javac/python

Sarcina lucrării

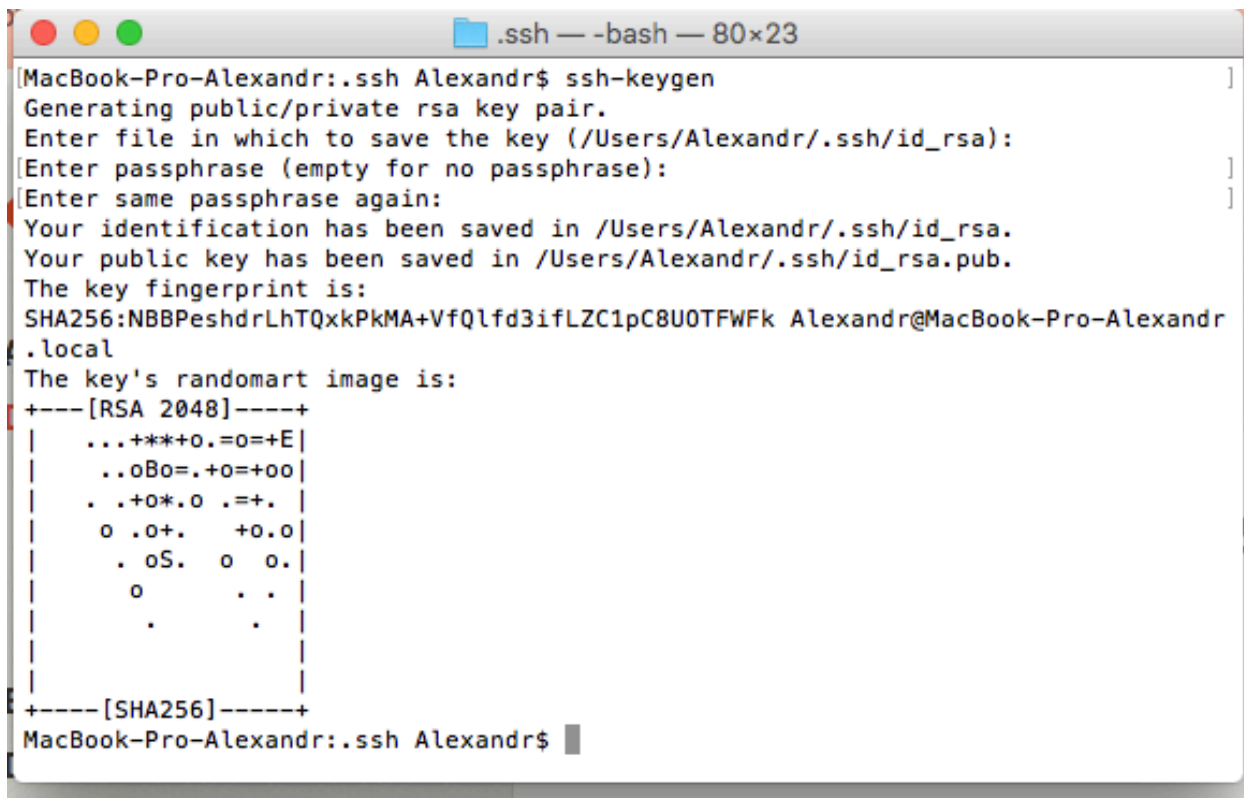

- **Advanced Level (nota 9 || 10):**

- setează un branch to track a remote origin pe care vei putea să faci push (ex. Github, Bitbucket or custom server)
 - resetează un branch la commit-ul anterior
 - merge 2 branches
 - conflict solving between 2 branches

- **Bonus Point:**

Scrie un script care va compila HelloWorldPrograms projects.

1. Configurarea autentificării ssh

```
MacBook-Pro-Alexandr:~$ ssh-keygen
Generating public/private rsa key pair.
Enter file in which to save the key (/Users/Alexandr/.ssh/id_rsa):
[Enter passphrase (empty for no passphrase):
[Enter same passphrase again:
Your identification has been saved in /Users/Alexandr/.ssh/id_rsa.
Your public key has been saved in /Users/Alexandr/.ssh/id_rsa.pub.
The key fingerprint is:

[MacBook-Pro-Alexandr:midps Alexandr$ git push
warning: push.default is unset; its implicit value has changed in
Git 2.0 from 'matching' to 'simple'. To squelch this message
and maintain the traditional behavior, use:

    git config --global push.default matching

To squelch this message and adopt the new behavior now, use:

    git config --global push.default simple

When push.default is set to 'matching', git will push local branches
to the remote branches that already exist with the same name.

Since Git 2.0, Git defaults to the more conservative 'simple'
behavior, which only pushes the current branch to the corresponding
remote branch that 'git pull' uses to update the current branch.

See 'git help config' and search for 'push.default' for further information.
(the 'simple' mode was introduced in Git 1.7.11. Use the similar mode
'current' instead of 'simple' if you sometimes use older versions of Git)

13. Găsirea soluției pe Stack Overflow cum poate fi ușor îndeplinită resetarea ultimului commit

7 Answers

active oldest votes

▲
231
▼

```
git reset --hard HEAD~1
git push -f <remote> <branch>
```

(Example push: `git push -f origin bugfix/bug123`)

This will undo the last commit and push the updated history to the remote. You need to pass the `-f` because you're replacing upstream history in the remote.

commit 01f9ec2418c3232ab32400e7d8d62ac972ac7264
Author: Alexandr <sashaialt95@gmail.com>
Date:   Wed Mar 16 15:59:45 2016 +0200

    Primul commit
[MacBook-Pro-Alexandr:midps Alexandr$ git merge another
Auto-merging java/hello.java
CONFLICT (content): Merge conflict in java/hello.java
Automatic merge failed; fix conflicts and then commit the result.
[MacBook-Pro-Alexandr:midps Alexandr$ nano java/hello.java
[MacBook-Pro-Alexandr:midps Alexandr$ git status
On branch master
Your branch is up-to-date with 'origin/master'.
You have unmerged paths.
  (fix conflicts and run "git commit")

Unmerged paths:
  (use "git add <file>..." to mark resolution)

        both modified:   java/hello.java

no changes added to commit (use "git add" and/or "git commit -a")
MacBook-Pro-Alexandr:midps Alexandr$
```

```
midps — -bash — 80x24

[MacBook-Pro-Alexandr:midps Alexandr$ git add .
[MacBook-Pro-Alexandr:midps Alexandr$ git commit -m "Conflict rezolvat"
[master 97fed2c] Conflict rezolvat
MacBook-Pro-Alexandr:midps Alexandr$
```

Bonus Point:

Bash-script-ul pentru compilarea hello_world-urilor in limbaje C, Java, C++, Python:

```
#!/bin/bash
gcc hello_c.c -o hello_c
javac hello_java.java
g++ hello_c++.cpp -o hello_c++
python -m py_compile hello_python.py
```

Concluziile

În cadrul acestei lucrări de laborator am studiat principiile și modul de utilizare a sistemului de control al versiunilor – Git. Prin intermediul CLI am configurat SSH autentificarea, am făcut primul git commit și am sincronizat dispozitoriul local cu cel remote, plasat pe server. Mai departe am reușit să fac “branch merging” și să soluționez conflictul care a apărut. Cunoștințele, obținute pe parcursul desfășurării lucrării de laborator vor fi foarte utile pentru realizarea proiectelor, ce urmează.
